DETAILED ACTION

Applicants cancellation of claims 1-7, Paper No. 5, 7/19/2002, is acknowledged.

Claims 8-19 are present for examination.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 8, 10, 11, 18 and 19, drawn to a polypeptide comprising the amino acid sequence of SEQ ID NO: 4 and a method of its use for isolating genomic DNA.

Group II, claim(s) 9, drawn to an antibody that specifically recognizes Drosophila Recombination Associated Protein (DRAP).

Group III, claim(s) 12 and 16, drawn to a method for targeting mutagenesis of a defined segment of DNA.

Group IV, claim(s) 13, drawn to a method for removal of a defined segment of DNA.

Group V, claim(s) 14, drawn to a method for cloning a defined segment of DNA.

Group VI, claim(s) 15, drawn to a method for mapping a defined segment of DNA.

Group VII, claim(s) 17, drawn to a method of introducing DRAP and a homologous oligonucleotide into a cell.

The inventions listed as Groups I through VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The

products of Groups I and II are directed to completely different polypeptides which are structurally unrelated and do not share the same or corresponding special technical features. The methods of Groups III through VII are directed to completely different methods which do not share the same or corresponding special technical features.

Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
